EXPERIENCE

Test Yantra Software Solution Pvt Ltd,

Bengaluru — Software Engineer

August 2022 - PRESENT

Developing User Interfaces: Building interactive and responsive user interfaces using React.js and related libraries and tools.

Implementing Design and User Experience: Translating design wireframes or mockups into fully functioning user interfaces with attention to detail and user experience.

State Management: Utilizing state management libraries like Redux to manage complex application states and data flow within the application.

Building RESTful APIs: using Node.js and its framework Express.

Integration with Backend APIs: Integrating front-end components with backend APIs or services using RESTful APIs.

Debugging and Issue Resolution: Identifying and fixing bugs, performance bottlenecks, and other issues that may arise during development or in production environments.

Collaborating with the Team: Working closely with designers, product managers, and other developers to understand requirements.

Code Review: Participating in code reviews to ensure adherence to coding best practices, maintainability, and scalability of the codebase.

Learning and Keeping Up with React.js: Staying updated with the latest trends, best practices, and libraries to continually improve your skills and contribute to the team's growth.
